

Introduction

This analysis is of tweets from the WeRateDogs twitter account.

My analysis revolved around the relationship between preferences and retweets , the most common dog ratings , the most common dog name and the most used Twitter app to post tweets.

analyzing

- 1- In my analysis, I realized that there is a relationship between favorites and retweets , we notice from the graph that the relationship is increasing , so the more favorites, the greater the retweet.

2- Also, in my analysis of dog classifications, I noted that the three most common classifications of dogs are 12, 10 and 11.

3- In my third analysis, Charlie was the most popular dog name, appearing 11 times in the dataset, followed by Oliver, Cooper and Lucy (10 times each).

4- In my latest analysis it's clear that the WeRateDogs broker prefers Twitter over the iPhone (98% of the time).
